GENERAL INSTRUCTIONS: To be effectively filed with the Plant Variety Protection Office (PVPO), **ALL** of the following items must be received in the PVPO: (1) Completed application form signed by the owner; (2) completed exhibits A, B, C, E, F; (3) for a tuber reproduced variety, verification that a viable (in the sense that it will reproduce an entire plant) tissue culture will be deposited and maintained in an approved public repository; and (4) payment by credit card or check drawn on a U.S. bank for \$4,382 (\$518 filing fee and \$3,864 examination fee), payable to "Treasurer of the United States" (See Section 97.6 of the Regulations and Rules of Practice). **NEW:** With the application for a seed reproduced variety or by direct deposit soon after filing, the applicant must provide at least 3,000 viable untreated seeds of the variety *per se*, and for a hybrid variety at least 3,000 untreated seeds of each line necessary to reproduce the variety. Partial applications will be held in the PVPO for not more than 90 days; then returned to the applicant as un-filed. Mail application and other requirements to Plant Variety Protection Office, AMS, USDA, Room 401, NAL Building, 10301 Baltimore Avenue, Beltsville, MD 20705-2351. Retain one copy for your files. All items on the face of the application are self explanatory unless noted below. Corrections on the application form and exhibits must be initialed and dated. **DO NOT** use masking materials to make corrections. If a certificate is allowed, you will be requested to send a payment by credit card or check payable to "Treasurer of the United States" in the amount of \$768 for issuance of the certificate. Certificates will be issued to owner, not licensee or agent.

NOTES: It is the responsibility of the applicant/owner to keep the PVPO informed of any changes of address or change of ownership or assignment or owner's representative during the life of the application/certificate. The fees for filing a change of address; owner's representative; ownership or assignment; or any modification of owner's name is specified in Section 97.175 of the regulations. (See Section 101 of the Act, and Sections 97.130, 97.131, 97.175(h) of the Regulations and Rules of Practice.)

SPECIFIC INSTRUCTIONS:

To avoid conflict with other variety names in use, the applicant must check the appropriate recognized authority and **provide evidence** that the permanent name of the application variety (even if it is a parental, inbred line) has been cleared by the appropriate recognized authority before the Certificate of Protection is issued. For example, for agricultural and vegetable crops, contact: U.S. Department of Agriculture, Agricultural Marketing Service, Livestock and Seed Programs, **Seed Regulatory and Testing Branch**, 801 Summit Crossing Place, Suite C, Gastonia, North Carolina 28054-2193 Telephone: (704) 810-8870. <http://www.ams.usda.gov/lsg/seed.htm>.

ITEM

- 19a. Give: (1) the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method;
 (2) the details of subsequent stages of selection and multiplication;
 (3) evidence of uniformity and stability; and
 (4) the type and frequency of variants during reproduction and multiplication and state how these variants may be identified
- 19b. Give a summary of the variety's distinctness. Clearly state how this application variety may be distinguished from all other varieties in the same crop. If the new variety is most similar to one variety or a group of related varieties:
 (1) identify these varieties and state all differences objectively;
 (2) attach replicated statistical data for characters expressed numerically and demonstrate that these are clear differences; and
 (3) submit, if helpful, seed and plant specimens or photographs (prints) of seed and plant comparisons which clearly indicate distinctness.
- 19c. Exhibit C forms are available from the PVPO Office for most crops; specify crop kind. Fill in Exhibit C (Objective Description of Variety) form as completely as possible to describe your variety.
- 19d. Optional additional characteristics and/or photographs. Describe any additional characteristics that cannot be accurately conveyed in Exhibit C. Use comparative varieties as is necessary to reveal more accurately the characteristics that are difficult to describe, such as plant habit, plant color, disease resistance, etc.
- 19e. Section 52(5) of the Act requires applicants to furnish a statement of the basis of the applicant's ownership. An Exhibit E form is available from the PVPO.
20. If "Yes" is specified (*seed of this variety be sold by variety name only, as a class of certified seed*), the applicant **MAY NOT** reverse this affirmative decision after the variety has been sold and so labeled, the decision published, or the certificate issued. However, if "No" has been specified, the applicant may change the choice. (See Regulations and Rules of Practice, Section 97.103).
23. See Sections 41, 42, and 43 of the Act and Section 97.5 of the regulations for eligibility requirements.
24. See Section 55 of the Act for instructions on claiming the benefit of an earlier filing date.

22. CONTINUED FROM FRONT (Please provide a statement as to the limitation and sequence of generations that may be certified.)

23. CONTINUED FROM FRONT (Please provide the date of first sale, disposition, transfer, or use for each country and the circumstances, if the variety (including any harvested material) or a hybrid produced from this variety has been sold, disposed of, transferred, or used in the U.S. or other countries.)

XP 08530727 first date of sale: AU on 01-Jun-07; NZ on 01-Jul-07

24. CONTINUED FROM FRONT (Please give the country, date of filing or issuance, and assigned reference number, if the variety or any component of the variety is protected by intellectual property right (Plant Breeder's Right or Patent).)

EXHIBIT A

Origin and Breeding History of XP 08530727, Garden Pea
'Mundial'

MAH
3/31/08

XP 08530727 was developed at Seminis's Western Breeding Station (WBS), Twin Falls, Idaho, by pedigree selection from a cross between two experimental breeding lines, 08590475 as seed parent and 08504228 as pollen parent.

08590475 was derived from a cross of Leah, a Seminis variety, with F240. F240 is a sister line to the Seminis variety Lazor, selected from the same BC1F3 family in 1986; this BC1F3 had been developed by backcrossing resistance to powdery mildew (*er* allele) and dark green berry color (*pa* allele) into the Seminis variety Pomak. The source of *er* and *pa* was a line designated as PM3 and derived from a cross of Stampede, a Seminis variety, with 9888, a dark green variety developed by Cannors Seed Company.

08504228 was developed by pedigree selection from a cross of Novella II with BoleroXMini DM (Novella II/Bolero/MiniDM). Novella II is a Syngenta variety. Bolero is a Seminis variety. Mini DM was developed by backcrossing an allele for resistance to downy mildew from JI 85, a pea accession from the John Innes germplasm collection, into the Seminis variety Mini.

The crossing and selections were made as follows:

- 12-96 Planted 08590475 as seed parent and 08504228 as pollen parent in the greenhouse at WBS. Crosses made.
- 4-97 Planted F1 in the field at WBS and allowed it to self.
- 4-13-98 Planted F2 in the field at WBS. Selected individual plants.
- 4-5-99 Planted F3 in the field at WBS. Selected individual plants.
- 8-17-99 Planted F4 in the greenhouse at WBS. Allowed to self pollinated and harvested as individual plants.
- 4-4-00 Planted F5 in the field at WBS. Selected individual plants.
- 4-3-01 Planted F6 in the field at WBS. Selected individual plants.
- 4-1-02 Planted F7 in the field at WBS under the number R02 1225. Selected this line for productivity, short erect plant type, attractive dark green berry color, and resistance to race 2 wilt, powdery mildew and downy mildew. Observations during the growing season indicated the line was uniform and stable. Subsequent increases of XP 08530727 all trace to the bulk of R02 1225.
- 4-8-04 Space planted XP 08530727 in the field at WBS under the number RWD190 and harvested as 200 individual plants.
- 4-7-05 Planted 200 individual plant selections in the field at WBS as a progeny increase under the number RWH 261. Observations during the growing season confirmed XP 08530727 is uniform and stable.

Selection criteria in the field represent a balance of characteristics related to productivity and quality and to goodness to fit for market needs such as short erect normal foliage plant, good quality, good yield potential, and resistances to powdery mildew, downy mildew, and race 2 of *Fuarium oxysporum fsp pisi*.

Observations during the two (2) years of 2002 and 2005 confirm XP 08530727 is uniform and stable within commercially acceptable limits. As is true with other garden pea varieties, a small percentage of off-types can occur within commercially acceptable limits for almost any characteristic during the course of repeated multiplications. No variants are known to occur.

Statement of Distinctness for ~~XP-08530727~~, Garden Pea*Mondial*

MAH 3/31/08

XP 08530727 is a late maturing, intermediate sieve size, freezer pea with normal foliage and resistance to powdery mildew and to race 2 of the wilt fungus, *Fusarium oxysporum fsp pisi*. To our knowledge the variety most similar to XP 08530727 is Lazor. The comparative characteristic that best distinguishes the two includes, but may not be limited to, resistance to race 2 *Fusarium* wilt based on the *Fw2* allele: XP08530727 carries the dominant *Fw2* allele for resistance, whereas Lazor carries the *fw2* allele and is susceptible.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0581-0055. The time required to complete this information collection is estimated to average 2.0 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

11. Additional explanation on ownership (Trace ownership from original breeder to current owner. Use the reverse for extra space if needed):

The variety named in this application was developed by the Seminis Vegetable Seeds, Inc., employee (breeder) identified below. By agreement between the employee and Seminis Vegetable Seeds, Inc., all rights to any invention, discovery, or development made by an employee are assigned to the Company. No rights to such an invention, discovery, or development are retained by the employee.

Employee (Breeder): David Webster

Site Location: Filer, ID

PLEASE NOTE:

Plant variety protection can only be afforded to the owners (not licensees) who meet the following criteria:

1. If the rights to the variety are owned by the original breeder, that person must be a U.S. national, national of a UPOV member country, or national of a country which affords similar protection to nationals of the U.S. for the same genus and species.
2. If the rights to the variety are owned by the company which employed the original breeder(s), the company must be U.S. based, owned by nationals of a UPOV member country, or owned by nationals of a country which affords similar protection to nationals of the U.S. for the same genus and species.
3. If the applicant is an owner who is not the original owner, both the original owner and the applicant must meet one of the above criteria.

The original breeder/owner may be the individual or company who directed the final breeding. See Section 41(a)(2) of the Plant Variety Protection Act for definitions.
